Outstanding Issues with BI Reports

Navigation Problem

Within a BI report, right click on a characteristic such as Employee to get context menu--*do nothing*-- move to different location within the report to come out of the context menu

Right click on another characteristic or same characteristic and it gives the warning message at the bottom left corner of status bar in IE, after which all navigation is disabled.

At this point, the report must be re-ran to obtain functionality again.

Launching Variable screen from Filter Area within Report

To adjust filter area, drag characteristics from navigation area into filter area

| | | | | | |

| | Fund(s) (Optional) | # <input type="checkbox"/> | ## |

[OK] [Check] [Cancel]

On some reports, empty variables display a '#' symbol as the Current Selection. These '#' symbols must be cleared prior to clicking Ok; otherwise, data will not be returned in the report.
